SEO / GEO / AEO Audit Report

QUICK AUDIT

SEO	GEO	AEO
6/10	**4/10**	**5/10**
On Track	*Needs Work*	*Needs Work*

Audit date: 2026-11-03
Prepared by Berat Uzun · method: SEO-GEO-AEO skill by Alex Labat

Executive Summary

ElternLeben.de has a solid classic-SEO base: one H1 per page, self-referencing canonicals, clean German URL slugs, an XML sitemap, and long expert-backed topic pages (2,400–4,400 words) that already use question-phrased headings with schema.org Question/Answer microdata. The most urgent problem is machine readability for AI: there is no JSON-LD anywhere, no Organization/Person entity, and the server returns 403 to GPTBot and ClaudeBot while robots.txt says "Allow: /". The FAQ hub (/haeufige-fragen/) arrives as an empty in the HTML, so crawlers that do not run JavaScript see no answers. The biggest opportunity is the brand migration: a clean Organization graph ("wellcome", alternateName "ElternLeben") plus Person markup for the named experts would turn the site’s strongest asset, real experts, into signals that machines can read.

Dimension	Score	Status	Key Takeaway
SEO	6/10	On Track	Good technical base; the homepage H1 is a course promo, there is no og:image, and some titles and descriptions are weak or missing
GEO	4/10	Needs Work	No entity markup and no dates or bylines; the AI crawler policy is inconsistent; the FAQ is rendered client-side
AEO	5/10	Needs Work	Q&A headings and microdata exist but have no FAQPage wrapper; the FAQ hub is empty without JavaScript
Combined	15/30		

Note on GEO and AEO: GEO (Generative Engine Optimization) is about being understood and cited by AI answer engines such as ChatGPT Search, Perplexity and Google AI Overviews. AEO (Answer Engine Optimization) is about being the direct answer in featured snippets, “People also ask” and voice assistants.

Pages Audited

URL	Page Type	Notes
/	Homepage	H1 = course promo; 0 JSON-LD; no og:image; 18 of 69 images without alt text
/ueber-uns/	About	Explains ElternLeben → wellcome; Q&A microdata; no meta description
/ueber-uns/experten/	Experts	4,432 words of bios; title is just “Experten”; 13 of 38 photos lack alt text
/ueber-stell-uns-deine-frage/	Advice (e-mail)	Strong copy; only page with og:image; duplicate og: tags
/online-beratung-formate/	Advice formats	Clear H2s per format; no Service schema
/baby/	Life-phase hub	7 Q&A pairs in microdata; 21 H2s; breadcrumbs
/gesundheit-ernaehrung/gesunder-schlaf/	Topic hub	2,513 words; Q&A microdata; no author or date
/erziehung-und-foerderung/wut/	Topic hub	1,054 words; no FAQ block; teaser-heavy
/haeufige-fragen/	FAQ hub	Content rendered client-side: HTML contains an empty #app
/robots.txt, /sitemap.xml, /llms.txt	Crawl files	robots.txt allows all; sitemap index OK; llms.txt returns 404

SEO Analysis

Score: 6/10 — On Track

Technical On-Page

Signal	Finding	Status
Title tag (home)	“ElternLeben.de – Die Online-Plattform für Eltern” (48 chars). Clean, but it says nothing about free expert help, the core value.	Needs Attention
Title tags (inner)	Some are too generic: “Experten”, “Über uns”, “Häufige Fragen”, “Online-Beratung Formate”. Topic pages are good (“Wenn die Wut kommt: Strategien für Eltern & Kinder”).	Needs Attention
Meta description	Present on the homepage (≈135 chars) and on topic pages. Missing on /ueber-uns/ and /ueber-uns/experten/ (og:description is empty).	Needs Attention
H1 (home)	“Dein Eltern-Stress-Test & 6-Wochen-Training”: a shop course promo, not the brand promise. One H1 per page on all pages audited.	Needs Attention
Heading hierarchy	The homepage has 13 H2s from about 12 stacked sections; “advice” appears as an H2 three times (Hebammen-Telefon twice).	Needs Attention
URL structure	Readable German slugs by life phase and topic (/kleinkind/kita/…). Keep them during the relaunch.	Good
Canonical	Self-referencing canonical on every page audited.	Good
Robots meta / indexability	No noindex found. robots.txt blocks /typo3/, ?id=, ?type= and solr params, which is sensible.	Good
Viewport	width=device-width, initial-scale=1 on all pages.	Good
Image alt text	Homepage: 18 of 69 images without alt, including expert photos (Nora Bromm, Natasha Eliason) and promo banners. Experts page: 13 of 38 photos.	Needs Attention
Open Graph / Twitter	og:title and og:description are present, but og:image is missing on the homepage and 7 of 8 pages. twitter:card is “summary” only.	Missing
Sitemap	TYPO3 sitemap index (pages + 7 “avos” pages), lastmod 2026-10-28, referenced in robots.txt.	Good

Content Quality

Signal	Finding	Status
Word count	Homepage about 1,500 words; topic hubs 1,000–2,500; experts page 4,400. Plenty of substance.	Good

Signal	Finding	Status
Topic focus (home)	No primary topic: the page mixes a course, webinars, advice (×3), newsletter, articles, experts and local offers.	Needs Attention
Freshness signals	No visible “last updated” or publication date on the topic pages audited.	Missing
Readability	Scannable with subheadings and teaser cards; topic hubs lean on link teasers over direct answers (e.g. /wut/ has 6 H3 teasers).	Good

Structured Data

Signal	Finding	Status
JSON-LD	None on any page audited (0 application/ld+json blocks).	Missing
Microdata	BreadcrumbList on topic pages; Question/Answer items on /baby/, /gesunder-schlaf/ and /ueber-uns/.	Needs Attention
Validity	Question items use itemprop="mainEntity" but have no parent FAQPage itemscope, so Google cannot attribute them to a FAQPage.	Needs Attention

GEO Analysis

Score: 4/10 — Needs Work

E-E-A-T Assessment

Signal	Finding	Status
Named experts	Strongest asset: a dedicated experts page with named professionals (midwives, educators, psychologists) and photos; expert faces on the homepage.	Good
Author on content	No byline or “reviewed by” on the topic pages audited. Expertise is visible on the site but not attached to articles.	Missing
About page	/ueber-uns/ explains mission and values, and the ElternLeben → wellcome transition, with Q&A.	Good
Contact / NAP	Only info[at]elternleben.de in the footer; address is in /impressum/. No ContactPoint markup.	Needs Attention
Trust signals	Testimonials on the advice page, “gemeinnützig”, donation CTA, © wellcome gGmbH. Hard facts (since 2002, number of locations, 36-h answer) are not prominent on the homepage.	Needs Attention
Organization schema	None. The entity is ambiguous: logo “ElternLeben.de”,	Missing

Signal	Finding	Status
	copyright “wellcome gGmbH”, text says “Zukünftig heißt ElternLeben wellcome”.	

Content for AI Synthesis

Signal	Finding	Status
Clear claim at top	The homepage opens with a course promo, not “free expert help for parents”. An AI summary of the page would lead with the wrong message.	Needs Attention
Factual density	Topic pages contain citable facts (sleep needs by age, sleep phases). The homepage has few hard facts.	Needs Attention
Entity clarity	Two brand names are used side by side without a machine-readable link between them (no alternateName or sameAs).	Needs Attention
Originality	Original expert advice, webinars and the “Eltern-Stress-Test” are unique content that AI engines would cite.	Good

Technical GEO

Signal	Finding	Status
AI crawler access	Tested by user agent: GPTBot → 403 and ClaudeBot → 403 (Apache “Forbidden”), while OAI-SearchBot, ChatGPT-User, Claude-User, PerplexityBot, CCBot, Googlebot and Bingbot → 200. robots.txt says “Allow: /” for everyone. The policy is blocked at the server but undocumented in robots.txt.	Needs Attention
JavaScript rendering	/haeufige-fragen/ ships an empty and is filled by JavaScript; a script rewrites FAQ links after a 3-second timeout. Most AI crawlers do not execute JavaScript.	Missing
llms.txt	Returns 404 (the soft-404 page is 114 KB).	Missing
HTTPS	HTTPS with nosniff header.	Good
sameAs / social	Links to Instagram, Facebook, YouTube and Pinterest in the HTML, but not declared as sameAs. The iOS app is not linked.	Needs Attention

AEO Analysis

Score: 5/10 — Needs Work

Featured Snippet Eligibility

Signal	Finding	Status
Question headings	Good pattern on hubs: “Wieviel Schlaf braucht man?”, “Wie erkenne ich, ob mein Baby ein Schreibaby ist?”, “Kostet wellcome etwas?”.	Good
Direct answer paragraphs	Answers exist in accordions; there is no answer-first 40–60-word summary at the top of a hub.	Needs Attention
Lists / tables	Tip lists by age group on /gesunder-schlaf/; no comparison tables (e.g. sleep need by age would suit one).	Needs Attention

Structured Answer Formats

Signal	Finding	Status
FAQ schema	Q&A microdata on 3 of 8 pages but no FAQPage container; the FAQ hub itself is empty without JavaScript.	Needs Attention
HowTo	No HowTo markup (e.g. “So funktioniert die E-Mail-Beratung” is a natural 3-step HowTo).	Missing
Speakable	None.	Missing

Voice Search Readiness

Signal	Finding	Status
Conversational tone	Natural “du” voice and real parent questions throughout.	Good
Long-tail coverage	Broad topic coverage (Schlaf, Wut, Kita, Trennung, Pubertät …) via life-phase and topic hubs.	Good
Local signals	“Angebote vor Ort” exists, but there is no LocalBusiness or Place markup for the roughly 220 wellcome locations.	Needs Attention

Priority Recommendations

Priority	Issue	Dimension	Effort	Impact
Critical	Add a JSON-LD graph on every page: Organization/NGO “wellcome” with alternateName “ElternLeben”, logo, sameAs; WebSite + SearchAction	GEO/SEO	Low	High
Critical	Make the FAQ hub server-rendered (or at least pre-render the answers into the HTML)	AEO/GEO	Medium	High
High	Decide on an AI crawler policy and document it in robots.txt (search and user agents allowed; training bots by choice) so it matches the server rules	GEO	Low	High
High	Person markup for each expert, plus “Geprüft von [Expert*in]” and a “zuletzt aktualisiert” date on articles (author, reviewedBy, dateModified)	GEO	Medium	High
High	Homepage H1 = the brand promise (“Echte Hilfe für Eltern – kostenlos, von Expert*innen”); move the course promo below it	SEO/GEO	Low	High
Medium	Wrap existing Q&A microdata in a FAQPage (or move to JSON-LD FAQPage)	AEO	Low	Medium
Medium	Answer-first summary (40–60 words) at the top of each topic hub; tables where data fits	AEO	Medium	Medium
Medium	Publish llms.txt listing the hubs, advice formats and experts	GEO	Low	Medium
Quick Win	og:image (1200×630, wellcome design) for the homepage and templates; twitter:card summary_large_image	SEO	Low	Medium
Quick Win	Alt text for all expert photos (“Nora Bromm, Hebamme”) and banners	SEO	Low	Medium
Quick Win	Meta descriptions and better titles for /ueber-uns/, /ueber-uns/experten/ and /haeufige-fragen/	SEO	Low	Low

What’s Working Well

Real, named experts	A dedicated experts page with photos and roles; experts answer e-mail questions and run webinars. This is E-E-A-T substance most competitors lack.
Clean information architecture	Life-phase and topic URLs (/baby/, /kleinkind/kita/, /familie-und-partnerschaft/trennung-mit-kindern/) with breadcrumbs. Keep them unchanged during the relaunch.

Q&A content already exists	Question headings and Question/Answer microdata on hubs and the About page. Only a FAQPage wrapper or JSON-LD is needed.
Technical hygiene	Canonicals, a single H1, viewport, sitemap index, and parameter blocking in robots.txt.
Transparent brand transition	/ueber-uns/ answers “Was ändert sich, wenn ElternLeben unter wellcome fortgeführt wird?”. This makes good source text for the Organization entity.

Beyond this audit: Core Web Vitals (pagespeed.web.dev), JavaScript rendering as Google sees it (Search Console URL Inspection) and backlink profile (Ahrefs/Sistrix) need tools outside an HTML fetch. Method: raw HTML fetched on 2026-11-03 with a browser user agent; AI crawler access tested with each bot’s published user-agent string (not from their IP ranges).
